Applications & use

Adhesive perfectly suitable for uses that need a good resistance to UV, drippings, solvents and to the temperature. Very good initial tack and adhesion on a wide range of substrates. It can stand up to the freezing after labelling to a temperature higher than 5 C.

The aluminium of the front material combined with a high adhesive weight permits to have labels with durability and resistance to the temperature. The main applications are nameplates, technical information label, eg labels on domestic appliances and automotive components.

Conversion

This kind of material has to be cut with dies very adapted. (NB : the poor tearing strength started by the front aluminium).

Excellent conversion characteristics on flatbed and rotary presses. The performances of this adhesive with an automatic laying answer to the market needs.

Shelf life

1 year stored at 22 +/- 2 °C et 50 +/- 5 %HR.
